

# Software Update (CS6)

This document contains instructions for updating the system software of the CS6 digital piano. Please read these instructions thoroughly before attempting to perform the software update.

## 1. Prepare the USB memory device

Copy the **CS6\_\_040.SYS** update file to the root folder of a USB memory device.

\* The USB device should be formatted to the 'FAT' or 'FAT32' filesystem.

## 2. Connect the USB memory device

While the instrument is turned off:

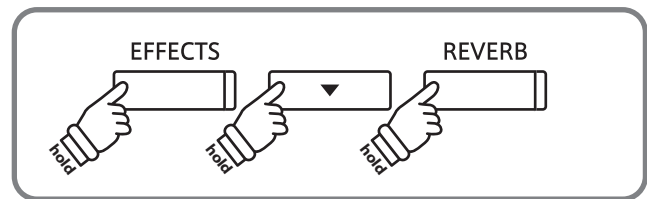

Connect the prepared USB memory device to the USB port.

## 3. Start the update

Press and hold the **EFFECTS**, **▼**, and **REVERB** buttons, then turn on the instrument.

The update process will start automatically after a few seconds, with status messages shown in the LCD display.

A rectangular box representing the LCD display. Inside, the text "Flash Programming by USB Memory" is shown in a pixelated, monospaced font, indicating that the software update process has begun.

\* Do not remove the USB memory device while the software update is in progress.

## 4. Disconnect the USB memory device

After approximately 30 seconds, a message will be shown in the LCD display, indicating that the software update has been successful.

A rectangular box representing the LCD display. Inside, the text "CS6\_\_040.SYS Boot End" is shown in a pixelated, monospaced font, indicating that the software update process has completed successfully.

Disconnect the USB memory device, then turn the instrument off and on. The updated software will be used automatically.

\* If the software update is unsuccessful, restart the process from step 1.

## ■ Checking the software version

To double check that the software update has been successful, press and hold the **ORGAN**, **HARPSI&MALLETS**, and **STRINGS** buttons, then turn on the instrument.

The current software version will be shown in the LCD display.

\* Turn the instrument off and on to return to normal operation.

# Software Update
