The new ES60: At home, on stage, your music.

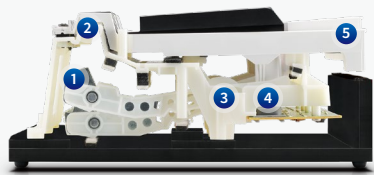

The touch of a grand piano

Realistic touch, natural motion

The ES60's *Responsive Hammer Lite* keyboard action offers a natural, expressive touch to help players build strength and develop technique, with grade-weighted keys that resemble the feel of an acoustic grand piano. Incorporating hammer sensing and cushioning technologies from Kawai's larger ES Series instruments, the RHL action provides smooth, responsive playability, and reduced mechanical noise for a quieter playing experience in the home.

Acoustic piano key weighting

Just as acoustic pianos utilise heavier bass hammers and lighter treble hammers, the *RH Lite* keyboard action also employs different hammer weights, graded for each playing range. This provides greater stability during fortissimo passages, while preserving delicate pianissimo control.

Authentic sound quality

The premier piano of Japan

Shigeru Kawai SK-EX concert grand pianos grace the stages of concert halls and musical institutions throughout the world, and are prized for their outstanding tonal clarity and exceptional dynamic range. The ES60 reproduces the rich, expressive sound of the SK-EX using stereo sampling and Kawai's advanced *Harmonic Imaging* technology.

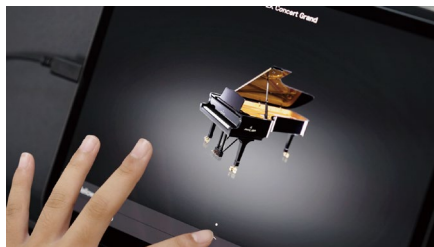

Variety beneath your fingertips

Supplementing its realistic Shigeru Kawai grand piano voices, the ES60 also offers a selection of additional sounds, including electric pianos, organs, harpsichord, vibraphone, and strings. Whether layering voices with Dual mode or assigning sounds to each hand using Split mode, the ES60 inspires musical creativity with a selection of useful tones.

This variety is brought to life by the ES60's powerful 20W stereo speaker system, which is able to fill a medium-sized room with its impressive, dynamic sound, delivering an engaging listening experience for both the player and audience alike.

Inspiring, convenient features

Complementing its authentic keyboard touch and sounds, the ES60 offers a range of useful features, including an adjustable metronome and 30 drum rhythms to help develop timing and technique. USB-MIDI connectivity allows integration with apps like *PianoRemote* and *PiaBookPlayer*, while Line Out jacks enable convenient sound reinforcement for recitals and performances.
